750 Motor Club 750 Formula Championship

750 Formula is for two-seater sports racing cars, introduced by the 750 MC in 1949, as its first racing formula. The regulations provide ample scope for the amateur to design and build his own car, and to develop his skills in chassis / suspension design and engine tuning within carefully controlled limits. There are two engine options, either the highly tuned Reliant 850cc or the unmodified Fiat 'FIRE' 1108cc, the latter introduced in 2003 due to the diminishing supply of spares for the Reliant engine. All cars run on a control Yokohama slick tyre.

MDS Battery RGB Championship

First introduced in 2001, this Championship is for two-seater cars which must be capable of passing an MOT. Cars may be constructed specifically for the series or may be one of the many motorcycle engined cars currently available. The engines must be series-production four-stroke units and may not be modified from standard; they run in three classes; standard Fireblade engined kit cars (class C), up to 145 bhp (class B), 146 to 180 bhp and all rear-engined cars (class A). Control tyre is the Yokohama AO48R.

750 MC Roadsports & 7 Championships

If it's a sportscar produced in a reasonable volume, it's probably eligible - there is no more varied a Championship for sportscars in the UK and its split into separate classes based generally on engine capacity/car type. Engine must be original fitment, but crank, rods, pistons, camshaft, induction and exhaust are free; head mods are permitted; add-on forced induction is not permitted. Power outputs will vary between 100bhp in the small class, to getting on for 350+bhp in the big V8s. Transmission must be a production-car gearbox. Close-ratio gears and LSD are permitted, traction control is not.

Demon Tweaks/Yokohama Stock Hatch Championship

The Stock Hatch Championship, is in its 8th year & continues to be the most popular championship in the UK. Modifications are strictly limited to basic rebore and blueprinting along with the use of standard gearbox; ignition systems are 'free'; suspension mods are limited to lowering and uprating of springs and dampers; brakes remain standard with free pad materials; a 'control' Yokohama A539 tyre and a weight penalty for leading cars ensures close racing at very affordable cost.
