ROADGOING SPORTSCAR Championship is probably the Club's most popular formula, catering for genuine production sports cars (as approved by the Club). Engine modifications are free within controlled limits, alterations to suspension and braking systems are permitted, tyres must be road legal and all cars must have a current MoT certificate. There are 4 classes:- up to 1330ccs; 1331 to 2500; 2501 and over; and a separate class for all Lotus 7 and Caterham 7 cars. A very wide range of cars always provides entertaining racing.

FORMULA 4, the Club's 'slicks and wings' single-seater formula, caters for the amateur designer/constructor in Class A where there are no chassis restrictions and engines are either the Ford 1300 crossflow or the 1600CVH; some cars are converted F3 or FF1600/FF2000, others are highly successful designs by the driver himself. Class B permits pre 1982 FF2000 cars run to those regulations. The combination provides very close racing, demands technical skill in preparation and setting-up and yet is still available within budgets lower than those usually expected for this type of racing. The Championship is supported by YOKOHAMA TYRES in 1994.

FORMULA VEE is a single-seater formula of free chassis design based upon original Volkswagen mechanical components and was first run in the UK in 1967. Once again sponsored by **VOLKSPARES**, the Volkswagen specialists, the championship is an ideal formula for both the beginner and the more experienced looking for competitive single seater racing on a low budget.

VW parts used include the 1300cc air-cooled engine, the Type 1 gearbox with specific ratios, the front and rear suspension and the braking systems; all these are controlled within the regulations and help to keep running and preparation costs affordable.

The KIT CAR CHAMPIONSHIP is for genuine roadgoing kit cars as recognised by the Club. Cars must be front-engined, run on road tyres and have a current MoT. Run in three engine-capacity classes of up to 1350ccs, 1351 to 1660ccs and 1661 to 3528ccs maximum, all engines must be genuine production engines and tuning is quite limited. Many of the cars are also used by their owners on the road and this is an ideal formula for the driver who wants to construct his own vehicle from a proven design.

WESPRESS CASTINGS 750 Formula Championship is for two-seater sports racing cars powered by the Reliant 850 cc engine. This formula is aimed at the designer/constructor/driver and the chassis regulations allow considerable freedom. The engine regulations require a standard block, cylinder head and crankshaft to be retained and power output is controlled by the use of a carburettor restrictor plate.

This year the championship receives support from WESPRESS CASTINGS of Willenhall, whose foundry produces a wide range of aluminium castings for both general and automotive use, the latter including castings for Formula Vauxhall Lotus and wheels for Bugatti.

The HOT HATCH CHAMPIONSHIP was started in 1993 and has two main sponsors - MARSHAL TYRES and FAST CAR MAGAZINE. The regulations allow any listed Hatchback car available for sale in the UK three or more years ago, up to a maximum of 1600 ccs, with a class split at 1400ccs. Multi-valved engines up to 1400 ccs go into the 'big' class. Minor engine modifications & suspension tuning is permitted and, apart from safety regulations, are identical to road cars. MoT is required and all cars run on a MARSHAL 767 tyre. Close and entertaining racing is guaranteed from this new 'low cost' formula.
