Welcome to the 50<sup>th</sup> Anniversary 'Holly' Birkett Handicap Relay Race. This race is a unique event in the world of motor racing and was originally conceived to give cars of differing performance the opportunity of competing on 'equal' terms in a long-distance race; the concept obviously worked and it has proved to be one of the most popular events in the UK.

The event is based upon a free relay system for teams of cars. Based upon information provided and many years of experience, the handicappers decide upon which team they consider will complete the most laps - this is the 'Scratch' team. The remainder of the teams are given credit laps according to their estimated performance in comparison to the Scratch team and these credit laps are added to those actually completed. Should the Safety Car be used, then the credit laps are proportionally adjusted. The results of the race can be affected by the tactics of the Team Manager just as easily as by the

performance and reliability of the cars. If one car in

a team is significantly faster than the others, the handicappers may assume that that car will attempt to do more than its fair share of the racing; in that case there may be a limit placed upon the number of laps which that particular car is permitted to complete. If that car does more than its permitted laps, the team faces disqualification from the handicap results, or can opt out of the handicap and simply race for the overall win. During the length of the race, cars will break down out on the circuit. The Team Manager has to decide by how long a car can be 'missing' before sending out a replacement. If the 'missing' car has simply spun and rejoined the race, no laps are scored whilst two cars from the same team are racing. Results are issued at 60 minute intervals to show the current placings both on handicap and actual.

## Some quotes from the AUTOSPORT magazine report of the 1<sup>st</sup> Relay Race, dated 31<sup>st</sup> August 1951.

“HOLLAND BIRKETT and the organizing committee of the 750 Club can be said to have put on an event which bids fair to become the ordinary club members’ classic.”

“The Six-Hours Relay Race, which was won last Saturday by the VSCC team of Bentleys, was a most enjoyable and attractive event, distinguished by a complete absence of “bull”, which was appreciated by the competitors.”

“... J.Carefoot (Lancia) lapped with the inevitable cigarette drooping from his mouth...”

“The start was inclined to be a trifle ragged, as quite a few drivers were strolling around chatting when the flag dropped...”

“... and Anne Newton did an unexpected about-turn when stopping at the pits...”

“...Another pits incident was when a certain TC Midget came in rather hurriedly and pranged his team-mate who was just getting ready to take over.”

Worthy of note is that two drivers taking part in today’s event, Doug Bukin and Sid Marler, both competed in the 1951 Six Hour Relay. They were both part of the London Area Austin Seven Formula Team which finished 4<sup>th</sup> in the results.

The highly-trained pit crew transmit vital information to their driver.

## Birkett 12 Hour Relay – The Handicap

This note is not intended to make excuses, but I thought a little explanation to go with the handicaps for this one-off (hopefully!) Birkett 12 Hour relay would show that the handicap process is not as straightforward as it is for the Annual 6 Hour relay (although that is not easy either).

This really is a bold step into the unknown. All the experience we have is for handicapping the End of Year 6 Hour relay. Experience over the years has been used to develop a formula, which calculates the net number of laps that a team can be expected to complete. This formula takes into account the shortfall due to pit stops, the fact that no driver can maintain optimum performance over long periods and the affects of traffic on lap times. There are many unknowns as to what will happen over 12 hours. Will teams pace themselves or will it be a 12 hour sprint? How will cars cope with running for 2 hours or more when they normally only run for a 15 minute practice and a 10 lap race? This formula has been used to calculate the credit laps for this event, there being no other relevant experience that we can base it on.

So, don't shoot the handicapper! There are bound to be some people who will not agree with their or other teams' credit laps. I am welcome to listen to constructive comments. I do this for fun (!!!) and want to enjoy the day as much as everybody else. This is an historic event for the 750MC and hopefully will be run in good spirits.

Terry Stevens  
Chief Timekeeper and Handicapper

### Provisional Credit Lap Allocation
